CASHEL® CUSHION PADS

Engineered to provide outstanding back protection and shock absorbency, Cashel® Cushion pads are made with a unique closed cell foam originally designed for the aerospace industry for weight distribution and shock reduction. They will not collapse or absorb moisture and bacteria the way open cell foam pads do, nor will they retain heat or add unnecessary weight the way liquid gel pads do. Extremely lightweight and conforming to your horse's back, they help relieve pressure points and are tapered at the edge to eliminate ridges, allowing closer contact with your horse. They go label side up with your saddle

directly on top. Recommended for use over a navajo, felt liner, or quilted pad. Clean with water and store on a smooth surface.

CORRECTION CUSHION PADS

Correction Cushion Pads aid in providing optimal comfort and protection and help adjust the fit of your saddle against the horse. They provide an easy way to help horses with muscle atrophy behind the shoulder or other conformational obstacles through the balanced distribution of saddle pressure.

Flat Cushion Pads

Even thickness with tapered edges to help relieve pressure points and allow close contact with your horse.
